About Me

Computer science moves fast, and that is part of what makes it so exciting. I enjoy being flexible, learning new things, and building software systems that are useful, simple, and solve real-world problems.

I am passionate about becoming a DevOps engineer, with an interest in building and maintaining scalable systems and automating workflows. I have experience with Docker and am eager to expand my skills into CI/CD, Kubernetes, Terraform, and cloud platforms. I am motivated to learn from real-world projects, automate systems, and follow DevOps culture. I also aim to follow AWS certifications.

Education

University of Moratuwa 2023 – Present

B.Sc. in Engineering (Hons) – Computer Science & Engineering

- CGPA: 3.71/4.0
- Dean's List in 2nd Semester (SGPS: 3.95)

Maliyadeva Boys College, Kurunegala 2018 – 2021

G.C.E. Advanced Level Examination

- 3As in Physical Science Stream
- Island Rank: 148, Z-Score: 2.5113

Projects

Collaborative Project Management Tool June 2025 – Present

Software Engineering Capstone Project (ongoing)

- A scalable project management platform with real-time collaboration features and advanced workflow automation.
- Building a collaborative microservice using WebSockets and Kafka
- Implementing microservices architecture using Spring Boot with a React.js frontend, combined with DevOps practices
- **Technologies:** Spring Boot, React.js, PostgreSQL, WebSocket, MongoDB, Docker, CI/CD

Smart Supply Chain Management System – Warehouse Module 2025

🔗 Source Code

Database Systems Integration Project

- A warehouse management module for intelligent supply chain optimization with realtime inventory tracking
- Wrote test cases integrated with GitHub Actions
- **Technologies:** Django, PostgreSQL, Docker, Supabase, RESTful APIs

AI-Powered Resume Analysis Platform

2025

🌐 Live Application

Personal Project

- Built an intelligent resume analyzing system with compatibility scoring using Puter.js
- Developed a responsive single page application (SPA) with modern UI/UX.
- **Technologies:** Puter.js, React.js, Tailwind CSS, Docker, React Router v7, Puter

Medilink – Healthcare Management Platform

2025

🌐 Live Application

Devthon Competition – Healthcare Innovation Track

- Designed a comprehensive medicine distribution solution with prescription processing
- Implemented a secure patient and pharmacies data management system with role based access control and compliance features
- **Technologies:** Next.js, MongoDB, Node.js, Tailwind CSS, Vercel

CBConstruction – Website Platform

2025

🌐 Live Application

Personal Project (ongoing)

- Developed a comprehensive business website with dynamic service portfolio and an automated client inquiry management system, including an AI chatbot
- Mainly targeted as a portfolio for the company, with plans to develop an employee management system in the future
- **Technologies:** PostgreSQL, Docker, React.js, REST APIs

Enterprise E-commerce Platform

2024

🔗 Source Code

Database Systems Capstone Project

- Developed a full stack e-commerce solution with advanced features including payment integration and order management
- Implemented a scalable database architecture with optimized queries and transactions.
- **Technologies:** React.js, Express.js, MySQL, Docker, JWT Authentication

Tools and Technologies

Programming Languages: Proficient in Java, Python, JavaScript, and C++ with hands on experience in building backend and frontend applications.

Backend Technologies: Developed RESTful APIs , WebSockets and microservices using Spring Boot and Node.js (Express) , experience with Kafka messaging systems (basic proficiency).

Frontend Technologies: Built interactive user interfaces and SPA applications using Next.js and React.js.

Databases: Designed and managed relational databases with PostgreSQL and MySQL , implemented NoSQL solutions using MongoDB.

DevOps Tools: Utilized Git for version control , containerized applications with Docker , deployed and managed applications using Kubernetes (basic proficiency).

Certifications

- GitHub Foundations Badge
- The Ultimate DevOps Bootcamp – KodeKloud
- Introduction to Generative AI
- The Complete Full-Stack Web Development Bootcamp – Udemy

Soft Skills

- Adaptability – can adapt to new technologies and learn quickly.
- Problem Solving – accept challenges with logical and creative solutions.
- Communication – can communicate well with teammates (currently conducting A/L Physics group classes).
- Teamwork – communicate effectively and maintaining a positive team environment.
- Time Management – can prioritize tasks and complete them efficiently one by one.
